

Renewable Energy Buyers Vietnam Working Group

Webinar # 4

Promoting a Gender Inclusive Workforce in Large-Scale Renewable Energy Projects

May 29th, 2020 – 9:00AM to 11:00AM (ICT)

Hosted by the Clean Energy Investment Accelerator (CEIA) and
USAID Vietnam Low Emission Energy Program (V-LEEP)

Due to travel and meeting restrictions related to COVID-19, this webinar series is temporarily replacing the in-person Renewable Energy Buyers Vietnam Working Group normally held in Ho Chi Minh City on a quarterly basis.

This webinar is the last of four webinars to be hosted by CEIA and USAID V-LEEP in May 2020.

BACKGROUND

The Renewable Energy Buyers Vietnam Working Group is co-organized by the [Clean Energy Investment Accelerator](#) (CEIA) and the [USAID Vietnam Low Emission Energy Program](#) (V-LEEP). Since 2017, the Working Group has brought together commercial and industrial (C&I) energy users interested in procuring clean energy, as well as renewable energy project developers and investors, and Government of Vietnam representatives.

The recurring Working Group is a platform for corporate RE market stakeholders to collectively identify and work toward policy, regulatory and financing frameworks needed to meet clean energy goals in Vietnam.

This four-part webinar series, spread across the last three weeks of May 2020, is an important opportunity to virtually convene market stakeholders during a pivotal phase of Vietnam's clean energy transition.

WEBINAR OVERVIEW

This webinar will bring together people working in personnel and human resources from renewable community engaged, or exploring engagement, in Vietnam's Gender Equality.

Ms. Do Viet Ha, Cross-cutting Advisor of USAID V-LEEP will host the webinar.

NEXT STEPS

- Please register to access the webinar via this [link](#)
- Please read the Webinar Guide [here](#) for information about using the Zoom platform

Please refer to the agenda on the page below

AGENDA

9:00 – 9:25am: Background Information

- Gender definition and Issues Identified
- Legal framework and Regulations
- Agenda 2030 and Vietnam's Response

9:25 – 10:10am: Gender Toolkit applied in Renewable Energy Projects

- Opportunities
- Stakeholder Mapping
- Toolkits
 - Recruiting and Developing Talent
 - Gender Inclusive Protections for Workers

10:00 – 10:10am: Short Break

10:10 – 11:00am: Q&A and Shares from Participants

ORGANIZERS

Clean Energy Investment Accelerator (CEIA Vietnam)

www.cleanenergyinvest.org

The CEIA is an innovative public-private partnership jointly led by Allotrope Partners, World Resources Institute, and the U.S. National Renewable Energy Laboratory. Through targeted engagement in key countries, the CEIA brings together large commercial and industrial users to demonstrate innovative renewable energy purchasing models and strengthen policy frameworks.

Allotrope Partners is an international clean energy advisory, investment, and project development firm specializing in emerging markets and technologies.

World Resources Institute (WRI) is a global research organization working at the nexus of environment, economic opportunity, and human well-being.

National Renewable Energy Laboratory (NREL) is a U.S. government funded research laboratory focused on developing and commercializing clean energy technologies.

USAID Vietnam Low Emission Energy Program (V-LEEP)

The Vietnam Low Emission Energy Program (V-LEEP), funded by the United States Agency for International Development (USAID), is designed to assist the Government of Vietnam (GVN) in establishing an effective policy, regulatory, and incentive environment for low-emission growth in the energy sector, while simultaneously attracting public- and private sector investment in renewable energy development and industrial energy efficiency.
